- Supplied with felt shingles roof
- Under 2.5m tall

As an option, we can now offer Insulated floors and Insulated roofs for your log cabin.

FLOORS

The floors are insulated with a 50mm foil backed solid foam board, which is kept off the concrete by 20mm pressure treated battens. The battens create a void which allows air to circulate, keeping the floor ventilated and dry.

ROOFS

The roofs are insulated with a 25mm foil backed solid foam board and then over layed with 12mm ply wood. The felt shingles are then applied to the ply wood. The finished thickness of the Cabin roof will be 50mm, which will greatly reduce the amount of heat loss from within the cabin.

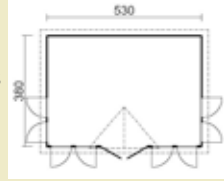

Both of these systems need to be installed at the time the Cabin is erected.

CLOCKHOUSE 44mm

Wall thickness	44mm
Base measures	5.3m x 3.8m
Log measures	5.5m x 4m
Wall height	2.22m
